

Parent Page Locations tab

All parent Pages set up through the parent-child tool will show corresponding children Places (aka store locations) through a new “Locations” tab.

The screenshot shows the Facebook interface for a parent page named "The Abyss". The "Locations" tab is active, displaying a map of Palo Alto, California. A search bar is present above the map, and a "Search" button is located to its right. The left sidebar contains navigation options: Wall, Locations (highlighted), Info, Friend Activity, Deals, Social Feed, Video, and Photos. The right sidebar includes sections for Admins (4), Deal (Free Cake!), Recommendations from Friends, and You and The Abyss. A green arrow points to the search bar, and another points to the "Locations" tab in the sidebar.

People will be able to search for store locations by zip code.

A new “Locations” tab will appear on the parent Page.

Check-ins from children Places will be included under the parent Page’s overall check-in number.

All locations near the user will automatically appear here with social context when applicable.

Parent-Child Linking

All children Places will include a link back to the main parent Page.

The screenshot shows the Facebook interface for a child page named "Baby Byss". The page displays the location "The Abyss Location" with a map and a link back to the parent page. The left sidebar contains navigation options: Wall, Info (highlighted), Friend Activity, Deals, and Social Feed. The right sidebar includes an "Edit" button. A green box highlights the location name and the link back to the parent page.

Parent Page Locations Tab: Admin view

All parent Pages set up through the parent-child tool will have an admin view of all their children Places.

The screenshot shows the Facebook admin interface for a page named "The Abyss". The "Locations" tab is active, displaying a table of child locations. A search bar is present above the table, and a "Save" button is at the bottom. Green arrows highlight the search bar, the table, and the "Save" button.

Admins will be able to search for locations by store ID.

Likes and Check-ins will appear by each Place.

Clicking on a name will take you to the child's Place Page.

Make the "Locations" tab visible or not visible to users. Save your settings if you make any changes.
